Dear Friends,

We are excited to release the 38th edition of the DotNetCurry (DNC) Magazine, a digital publication dedicated to .NET, Cloud and JavaScript developers and architects.

In our 38th edition, we have some exclusive articles for you covering:

- Writing Pure Code In C#
- Serverless Apps with Azure Functions
- The Evolution of C# - v1.0 to v7.0
- Unit Testing Angular Components
- Blazor - An overview
- Project Management - NFR

Thank you to our fabulous contributors and sponsors without whose time, resources and efforts, this 38th edition wouldn't have been possible.

Are you on Twitter? Help us share this magazine with fellow developers by [retweeting this link!](#)

Just as always, email me your feedback at sunrot@magarwal@dotnetcurry.com. I do read every feedback that is sent across. Thanks :)

Modern monitoring for your infrastructure, apps, and logs
Datadog provides dashboarding, alerting, application performance monitoring, and log management in one tightly integrated platform so you can get end-to-end visibility quickly. Visualize key metrics, set alerts to identify anomalies, and collaborate with your team to troubleshoot and fix issues fast. [Try Datadog's full-stack monitoring for free.](#)

Download the Fastest and most advanced Charting component for .NET with plenty of demos and performance benchmarks. [Get a Free Trial of Lightning Charts!](#)
